EXPERIENCE

SAE AutoDrive - Toronto Autonomous Vehicle Team (aUToronto)

Sep. 2025 – Present

State Estimation Developer

Toronto, ON

- Developed and integrated a **lane localization** model and a state rollback feature to enhance vehicle positional accuracy and system robustness.
- Leveraged **ROS** for data analysis and testing.

FIRST Robotics Competition

Jul. 2021 – Jun. 2025

Robotics Team Captain & Software Development Lead

Ottawa, ON

- Founding member and leader of a 90+ high school student team competing at a national level, qualifying for the **World Championship** and **2x Finalists at Provincial Championships**.
- Developed accurate autonomous routines in **C++**, leveraging **computer vision** and **odometry**.
- Enhanced robot performance and precision using feedforward and PID feedback **control systems**.

RESEARCH & PUBLICATIONS

Control Systems Paper on PID Optimization | Java, Python, Matplotlib

Mar. 2025

- Developed a novel PID tuning method, boosting robotic control stability and precision
- Outperformed standard tuning techniques through experimental benchmarking
- Independent technical paper in progress, integrating control theory and real-world robotics testing

Bruce Lab — University of Ottawa | Research Assistant

Aug. 2024

- Reduced transient time by 80% and steady-state error by 40% by implementing PID control systems in C++ to stabilize current and voltage in platinum-nickel electrodeposition for Fuel Cell Electric Vehicles.
- Reduced calibration time by one-third, developing a Python user interface to conduct trials **autonomously**.
- Expanded trial voltage limits by 5x, refining an **Arduino**-based potentiostat electric circuit.

Canadian Robotics and Artificial Intelligence Ethics Design Lab | Robotics Research

Aug. 2024

- Accelerated project timeline by 50% by characterizing DJI's Robomaster S1 in a simulative environment.
- Achieved 1-second target tracking by implementing computer vision models with Python **machine learning**.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, Javascript, Typescript, HTML, CSS

Robotics & Control: ROS, PID control, state estimation, sensor fusion, odometry

Tools & Libraries: NumPy, Matplotlib, pandas, Arduino, Git, Next.js

AWARDS

HackTheNorth 2024 2x Award Winner: Best Use of MongoDB, SymphonicLabs

2x FRC Provincial Finalists: FIRST Robotics 2023, 2024

Harvard-MIT Math Tournament: Qualified Participant

FIRST Alumni Entrance Scholarship: Value of \$15,000

Dean's List Semi-finalist: First Robotics Competition

EDUCATION

University of Toronto

Toronto, ON

Bachelor of Applied Science — Engineering Science (GPA: 4.0)

2025 - 2030

Research Interests: Control systems, robotics autonomy, state estimation, applied optimization
